

HTTP & REST Basics

HTTP (Hyper Text Transfer Protocol) is the foundation of data communication on the web. REST (Representational State Transfer) is an architecture style that uses HTTP methods to interact with resources. The four core methods are GET, POST, PUT, DELETE. Each ~~Method~~ request targets a URL endpoint and returns a response with status code 200.

Success. 404 mean not found
500 Internal server error.

REST API communicate using JSON as the standard data format.
